

We hereby confirm that production plant with following details have been qualified as Carbon Neutral as per our standards which is defined in our ResorsusGreen Program Mitigation Guidelines.

Mitigation Quantity Explanation

Caspian Coffee is a coffee roasting company based in Messina Italy, that specializes in providing single origin coffee beans, ground coffee, and espresso capsules.

Caspian coffee plans to reduce their Green House Gas emissions by %40 with purchasing electricity with Guarantees of Origin Certificates. Also, during 2024 company plans to install solar power plant to roofs in their main premises and the roastery will undertake an insulation project in Messina plant.

Besides, company is looking options to produce bio-waste electricity from coffee wastes.

While implementing Caspian Green Program, starting from beginning of next year company plans to procure only Green House Gas mitigated packaging for the their GreenCoffee line.

Green House Gas Summaries

Scope	CO2 Eq. Emission/ Tons
1	427
2	503
3	774
Total Emissions	1.704

Company's Green House Gas scope 1 emissions are caused by operations in roastery in Messina. Scope 2 emissions are caused by the electricity purchased from Italian grid. Scope 3 emissions are caused by delivery operations.

Supported Projects for Mitigation

Cookstoves	Biodiversity	Wind	Total Mitigation
146	860	698	1.704
Total Mitigated Amount of CO2/ton:			1.704
Mitigation Rate:			100%
